

**The Per-Fil Model PF-23 is an automatic filling system; its modular design allows for high speed filling of difficult products and containers.**

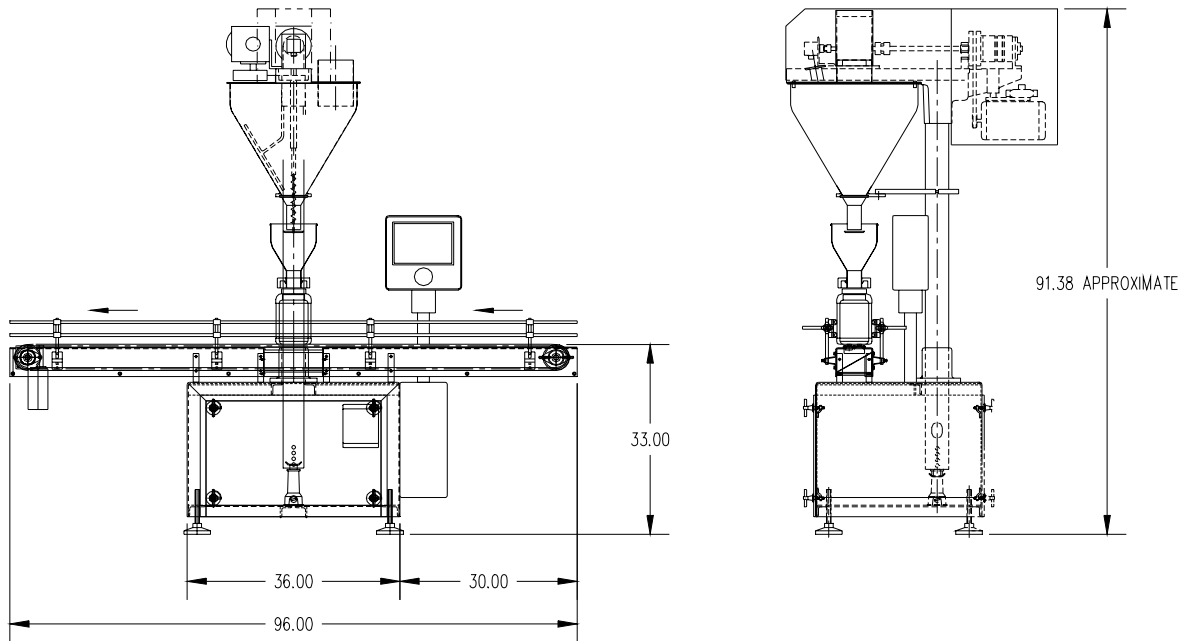

The Per-Fil Industries Model PF-23 can fill virtually any rigid container at speeds up to 40 cpm.

This rugged fill system features our ultra precise clutch brake fill head; heavy duty 3/16" SST base with maintenance-friendly see through access doors; 7'-0" long conveyor with fill zone dust trough.

*Available options include:* Jack screw head height adjustment; 6" stroke container lift for compression or bottom-up filling; vibrating wearstrip bridge; multiple conveyor designs to accommodate the specific needs of different styles of containers; volumetric or high resolution weigh cells for net or gross weight filling.

# PF-23
